

Assignment - React.Js Developer

About Listed

We are a lab building products for the creator economy. Why so, because we are on a mission to empower the individual to realise/unleash their full potential. Following are some of our flagship products:

Listed.fans

We Listians find it very painful that unlike tech entrepreneurs there's little to no capital available for our darling social media creators or influencers, the wonderful people who entertain us, educate us and so so much more. And this is not just the case for social media creators but individual performers of any form whether they are, cricketers, singers, dancers, actors etc...

So, listed helps rising creators get funded, just like startups. By being-there done-that's like mega-influencers, agency owners and brand CXOs to launch and accelerate their own creator-ships. In return, these rising stars pledge to share a portion of their future incomes with their investors for a certain fixed period of time.

So, if you believe the gifted individuals of today will overshadow the companies of yesterday, and in doing so, have the right to capital & guidance, then welcome to the tribe.

OpeninApp

Almost all your favourite creators on Instagram, share links to their latest Youtube videos or Youtube channels in their bio or stories. But whenever you tap on those links, you get redirected to the youtube website instead of the youtube app. And here you can't watch the video in full screen nor can you like it, comment on it or subscribe to the channel.

Ever wondered why it is so? That's because Instagram has something called a Built—IN-Browser that opens up instead of opening the app you wanted to open. Which is not cool at allAnd this is not just so for IG but for all your favourite social media apps eg.Youtube, LinkedIn, Twitter, Snapchat, Telegram, Quora etc..

So we fixed this problem of sub-optimal user experiences by building a tool that ensures all social media links open in the apps they should. It's called OpeninApp. And it is already loved by over 20,000 influencers & brands including the likes of Munawar Faruqui, Raj Shamani, Riva Arora, Aishwarya (Ranjnikant-ji's daughter), trak-in Tech, Mamaearth etc.. And has been used by 55Mn+ users.

So if you are someone who is passionate about social media and wants to improve User Experiences for a Billion people, then welcome home.a Billion people, then welcome home...

TASK

You are provided with 2 basic screens Dashboard UI. You need to convert the high Fidelity design into code using React/Next and CSS/SASS/SCSS/LESS/Tailwind CSS.

Use of any other CSS framework is prohibited.

What you have to achieve -

- Make a basic auth using Google (Login/Signup using google)
 - Resource: <https://next-auth.js.org/>
 - Design File Link: <https://www.figma.com/file/gKLhBDaTmdNDzHjsvqFMmC/Front-End-Developer-Task?node-id=0-1&t=rJ4A60cFvrDoc5TE-0>
- The dashboard should be pixel-perfect and look like a replica of the design.
- Don't blindly copy and paste the Figma inspect code. Use your skills to make it fit all screens, in simple terms it should be **responsive**.
- The charts should be working with some dummy data.
- Fetch the basic data using Axios/Fetch. (You can build an API or fetch json from public repo)
 - Resource: <https://github.com/public-apis/public-apis>

How to submit:

Please deploy your assignment on hosting services like Netlify or Vercel, and kindly share the link with us via the email address careers@listed.freshteam.com.

By When can you complete the task:

Preferably 48 hours. Let us know, If you need more time.

To make this assignment worth your time, make something that you can use to showcase your skills and knowledge in the future. After all, your work is more a reflection of who you are and less of what we ask.

Feel free to write, if you have any doubts - navami@openinapp.com / careers@listed.fans
